

# IDEAS TO HELP THE ENVIRONMENT

## PROPOSAL FOR OUR HEADMASTER

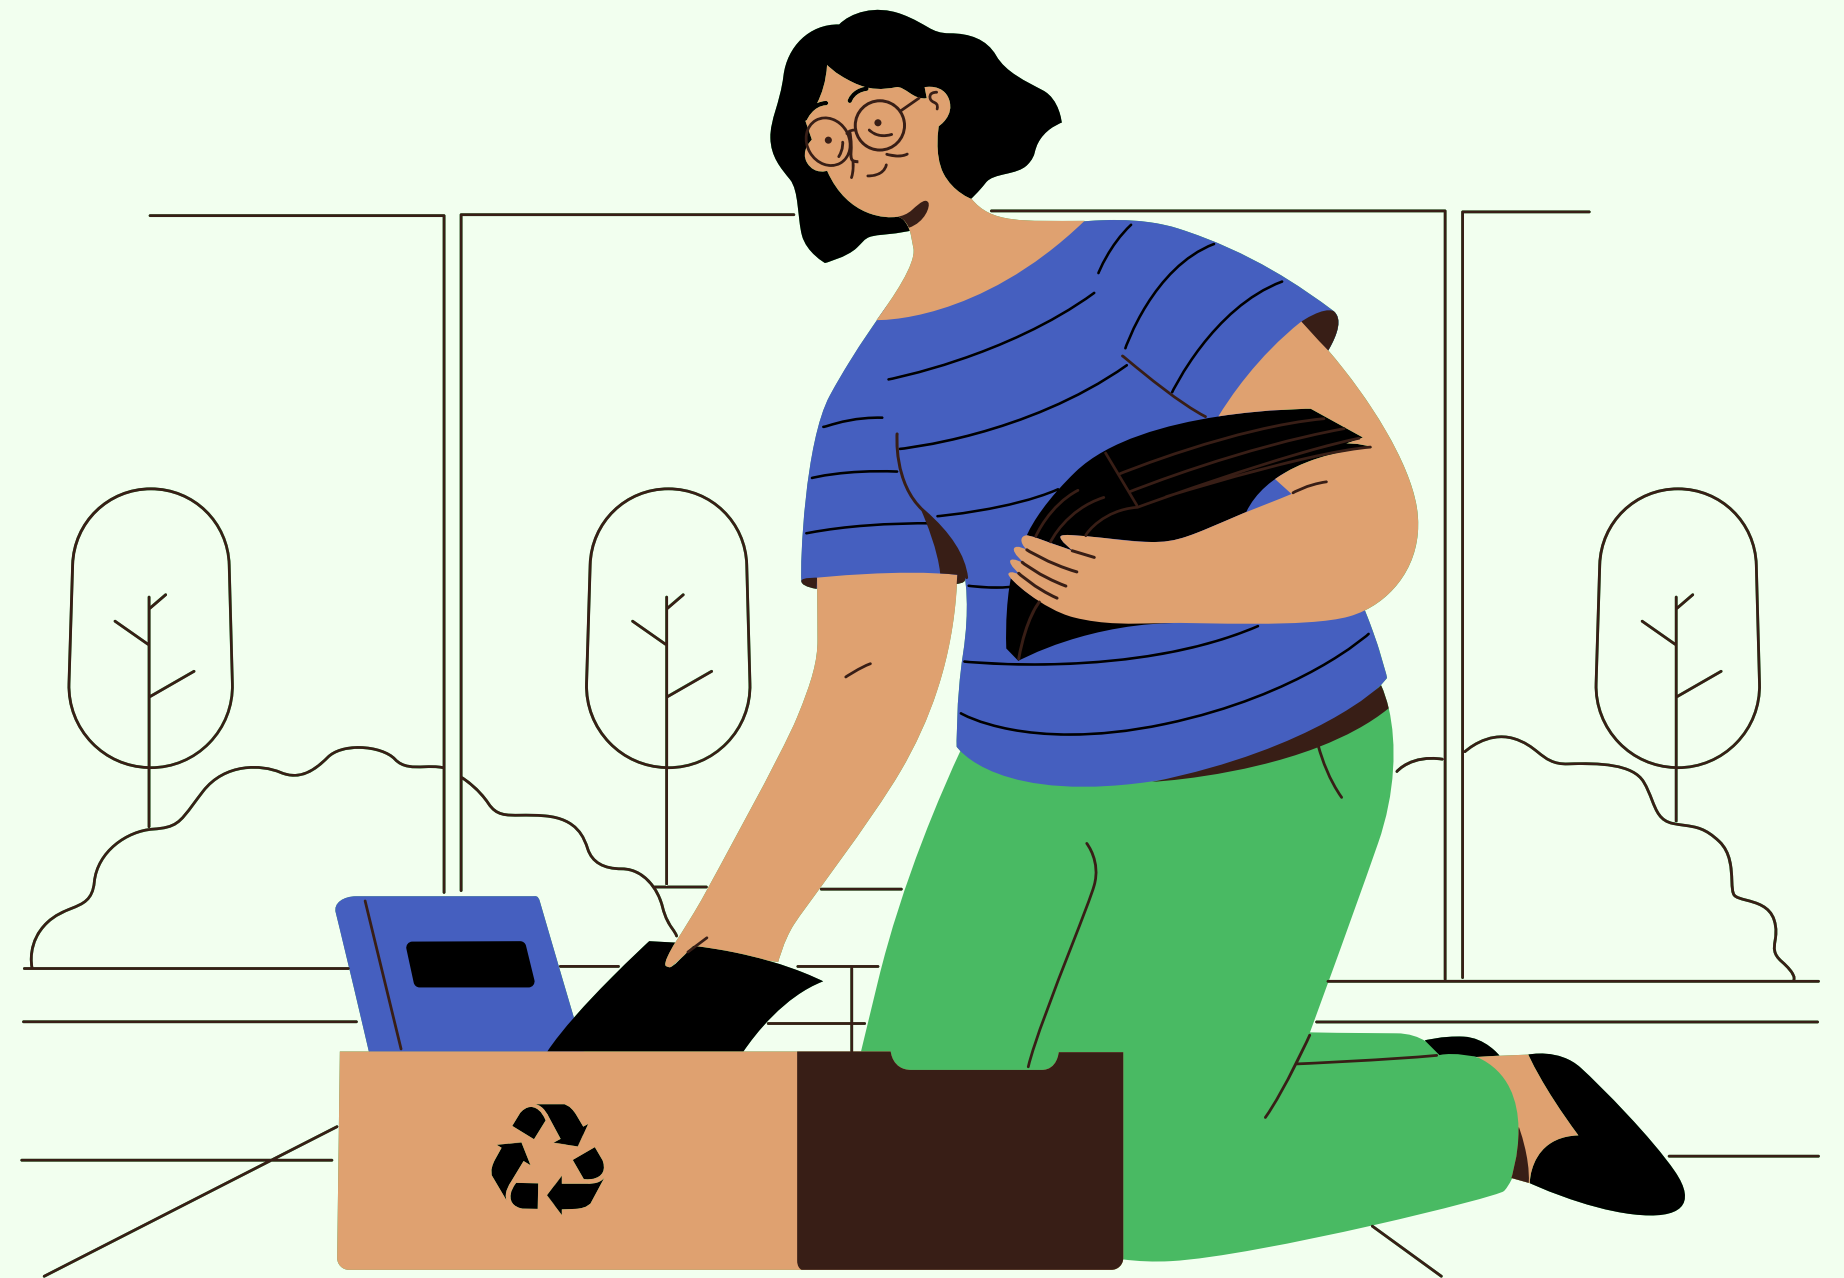

Irene Fernández

Patricia Ruiz and Celia Moreno, 1º B Bach

# 1. A SUSTAINABLE LUNCH DAY

One day a week the school should offer students food without plastic wrapping, glass bottles, and healthier food.

## 2. A RECYCLING CLUB

Another idea is to create a recycling club so that students can leave school once a month to collect and recycle rubbish from a nearby park.

# 3. A SCHOOL GARDEN

A very interesting idea could be to create a school garden in which students could sow seeds with seasonal crops and then hold healthy food markets.

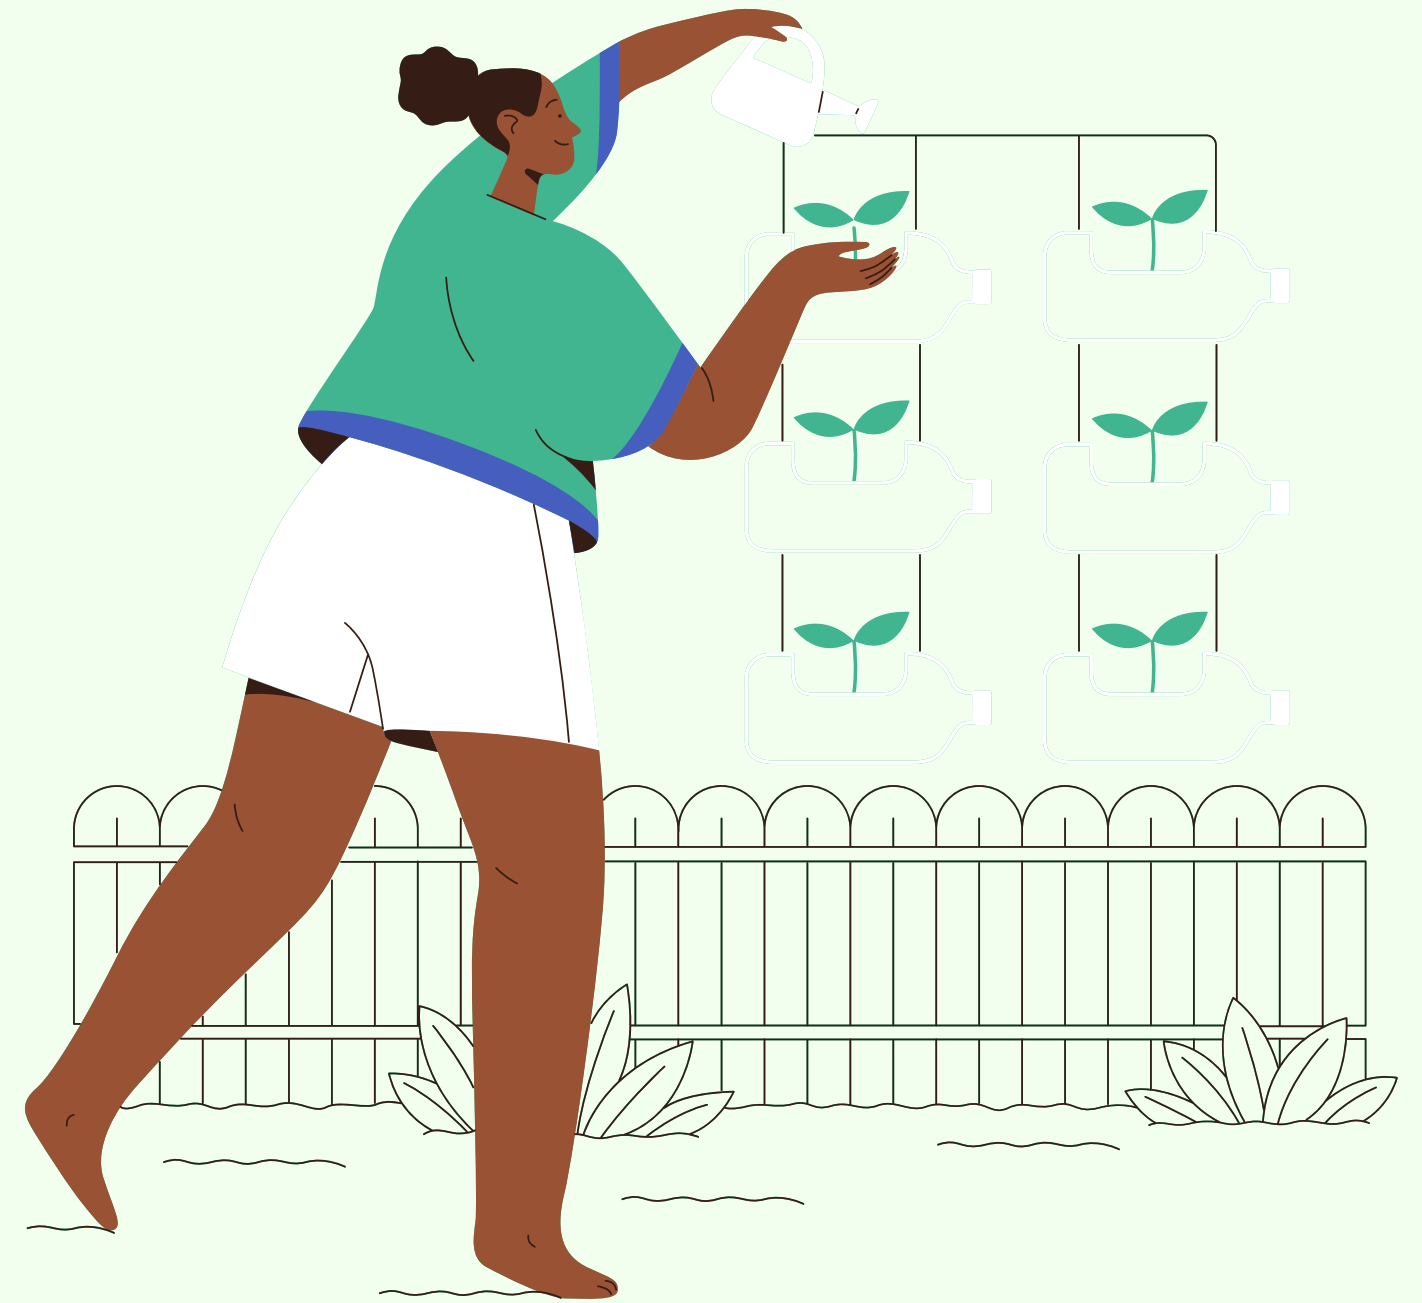

# 4. SCHOOL SUPPLIES MARKET DAY

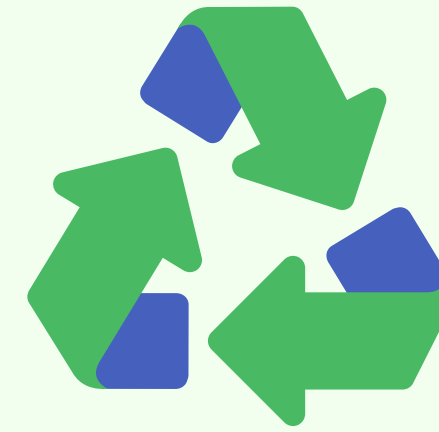

An idea to help each other is to have a market with the school supplies that we no longer use. So we can give them another use

# 5. REDUCE PAPER USE BY INVESTING IN ELECTRONIC DEVICES

The last idea of this proposal is that the school provides us with an electronic device (tablet or computer) on which we can have all the school material and reduce photocopies and books.

THANKS!
