

Dear Headmaster,
help us save the
environment!

By: Mercedes González Navas

Here are my
proposals to help
protect the place
where we live:

1. Turn off the lights

Turn off all classroom lights after break. This way we can reduce energy to help the environment and also save money to buy more solar panels, which would be the best option.

2. Pick up trash.

Every week at the end of the school day; one class should pick up the rubbish left in the playground. This way we'll all be aware of how bad it is to pollute our environment. And the students will stop littering and start recycling.

3. Walking Days

To reduce the pollution caused by school commuting, students living within a 15-minute walking distance should walk to and from school every Tuesday and Thursday.

4. Plant life.

Biology students will plant a tree once every two months. Trees give us life and are also used to make materials, so those trees that are cut down must be replanted.

Thanks for your attention!

**Let's work together to stop
climate change!**
